Dear Hiring Manager,

I am writing to express my enthusiastic interest in Software Developer and Data Engineer opportunities within your organization. As a recent Computer Science graduate with hands-on experience in building full-stack applications and scalable data pipelines, I am equipped with the skills and drive to deliver tangible results from day one.

My recent role as a Full Stack Developer and Data Engineer at UnitacSolution provided me with a robust foundation in the entire development lifecycle. I thrive on transforming complex requirements into efficient, cloud-based solutions. My key competencies include:

- Full-Stack Development: Designing and developing secure, scalable RESTful APIs with Node.js and engineering high-performance cross-platform applications using React Native.
- Data Engineering & ETL: Building robust pipelines to clean, transform, and prepare data for accurate analytics and machine learning applications.
- Cloud & Database Management: Deploying and managing solutions on AWS and Google Cloud Platform (GCP), alongside optimizing SQL queries and managing relational databases (MySQL, PostgreSQL) for production environments.
- Proven Impact: I am results-driven, with key achievements such as reducing API response time by 40% through strategic optimization and delivering a mobile application successfully piloted with over 500 users.

To complement my practical experience, I hold a suite of AWS certifications (Cloud Practitioner, Data Engineer, Data Scientist, and Generative AI), demonstrating a committed and up-to-date understanding of modern cloud and data architectures.

I am a passionate problem-solver, eager to contribute to a team that values innovation, technical excellence, and data-driven decision-making. I am confident that my blend of practical skills, foundational knowledge, and certifications would make me a valuable asset to your engineering team.

Thank you for your time and consideration.

Best Regards
